

ADVANCED SUBSTRATE DEVELOPED TO INCREASE MACHINING PRODUCTIVITY AND PERFORMANCE IN TITANIUM AND ISO M MATERIALS

HYPERION AM70 BENEFITS

- Perfect balance of toughness and hardness to resist early fracture and edge wear
- Significant increase of tool life
- Maintains cutting edge integrity
- Increase machining productivity
- Reliable and consistent performance.

PERFORMANCE TEST

Operation: Milling

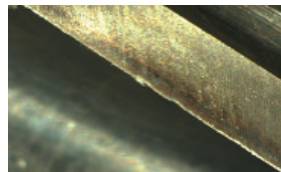

Work piece material: Titanium

Blank: Hyperion tolerance RU GI series,
providing superior total indicated
runout (TIR) performance

RESULT

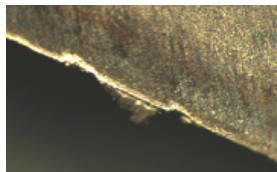

Tool life: Increased more than 25%

Cutting edge: Superior integrity
